🪪 PROFILE

I'm a passionate software developer who loves crafting products that people love.

I'm a huge lover of Open source and also volunteer in many communities

I care about making the customers happy, testing, accessibility, teamwork, and code quality.

🧠 SKILLS

- Front End | JavaScript, React, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3.

- Back End | Node.js, MongoDB, MySQL, Firebase, RESTful API Development.

- Developer Tools | Git, Npm.

💼 PROFESSIONAL EXPERIENCE

100devs Agency, Full stack Software Engineer (Remote)
09/2022 – present | LA, CA, USA

- Collaborate with a team of developers to build modern and responsive web applications using best practices.
- Helped with **organizational tasks** such as moderating our weekly Dev meeting.
- Documented usage of performance APIs, which increased the **code quality**
- Agile methodologies like SCRUM for project management.
- Architected semantically structured full-stack web applications with the MERN stack while following the Model-View-Controller (MVC) architectural pattern, making collaborating with other developers easier.

🏠 OPEN SOURCE AND COMMUNITY

Highlight.io, Full-Stack Engineer
09/2023 – present

- Collaboration with designer and product manager to ship major features for displaying rage clicks tracked in applications using Highlight.
- Build and contribute to open-source design system components with React, Typescript, and CSS in JS.

VOLUNTEERING

- Helped organize mailing for end-of-year fundraising campaigns.
- I also volunteer for a Hackathon project.

📁 PROJECTS

Happy Notes (Fullstack Web App)

- Users can log in to their profile and find their list of notes. They can add new notes through an input, which they can then edit or delete all notes in their profile.

Football Highlights (frontend Rest API)

- Web App utilizes data fetched from scorebat API to display football highlights and statistics to over 1000 users.
- Manipulated the DOM to display highlights from different football leagues depending on which button got clicked.
